Evidence - Based Model for Evaluation of
Radicalisation Prevention and Mitigation

Deliverable No. 8.6

D8.6 Final Management and quality Report

September 2024 (M37)

Authors: Natalia Jarmuzek-Troczyńska (PPHS), Martyna Kakalec (PPHS) with the input from Work Package Leaders and Task Leaders

Abstract:

This document describes the progress of the INDEED project in the second reporting period, i.e., from March 2023 to September 2024 (M19-M37), and focuses on showing the objectives, milestones and results that were achieved by the end of the project. The document also provides an overview of all Work Packages with a special focus on the above elements. The report is a continuation of the deliverable [D8.5 Mid-term Management and quality Report](#), which was submitted halfway through the project and covered the months September 2021-February 2023 (M1-M18) and which described in detail the implemented project management procedures, coordination structure and key responsibilities that were performed by the individual consortium bodies. Therefore, this report should be read in conjunction with the first one ([D8.5](#)), as the management approach and quality standards have remained unchanged and continued in the second part of the project, while their description is included in detail in the first report. This document is a summary of the actions taken to effectively and efficiently manage the project in accordance with the quality standards and procedures described in the Project Management Guidebook (D8.1) as well as in line with the recommendations from the Mid-Term Review.

This project has received funding by the European Union's
Horizon 2020 research and innovation programme
H2020-SU-SEC-2020 under grant agreement no 101021701

1 INTRODUCTION

INDEED aims to strengthen the knowledge, capabilities and skills of PVE/CVE and De-radicalisation first-line practitioners and policy makers in designing, planning, implementation and in evaluating initiatives in the field, based on evidence-based approach. INDEED builds from the state-of-the-art, utilizing the scientific and practical strengths of recent activities – enhancing them with complementary features to drive advancements and curb a growing rise of radical views and violent behaviour threatening security.

The INDEED methodological framework is based on the '5I' approach i.e. 5 project phases: Identify; Involve; Innovate; Implement; Impact. At the core of INDEED's work methodology is an interdisciplinary and participatory approach, which includes the co-creation of individual project phases and implementing them with the close engagement of multi-sectoral stakeholders. The creation of SMART Hubs (Stakeholder Multisectoral Anti-Radicalisation Teams) as part of INDEED is intended to facilitate this process.

The selected results of the project are:

1. A universal Evidence-Based Evaluation Model (EBEM) for evaluating radicalisation prevention and mitigation initiatives.
2. A practical EBEM-based evaluation tool.
3. Professional e-guidebooks.
4. A collection of user-friendly repositories (repository of risk and protective factors, repository of evaluations and evidence-based practices) for practical use by practitioners and policy makers.
5. Targeted curricula and trainings (onsite/ online).
6. Lessons learnt and policy recommendations.

All results are integrated and openly accessible in the INDEED multilingual [Toolkit](#) for practitioners and policy makers in the field for the entire lifecycle of PVE/CVE and De-radicalisation initiatives, from design to evaluation.

The main objectives of the Work Package 8 (Project Management) were:

1. Facilitate the smooth and organised delivery of the INDEED project, ensuring all obligations are met with minimal interference.
2. Support the actions of the work packages, but allow the work to flow unhindered by unnecessary checkpoints.
3. Plays an integral role in maintaining connections between the project Partners and facilitating an environment conducive for integration and cooperation. The Project Management Office (PMO) and Project Coordinator are accountable for all matters connected to the Grant and Consortium Agreement; monitoring, measuring and maintaining milestones and deliverables; the management of internal communications and relations between the project consortium, specifically the Work Package Leaders and Advisory Boards; data management provisions; maintaining the high-level scope of the project in accordance with the Gantt chart and project timeline.

1.1 INDEED PROJECT OBJECTIVES AND ACHIEVED RESULTS

INDEED aimed to strengthen the knowledge, capabilities and skills of PVE / CVE and De-radicalisation first-line practitioners and policy makers in designing and evaluating evidence-

based initiatives. **Five project-specific objectives have been identified** to ensure the achievement of the overarching objective described above.

1. The first objective: *To develop a co-created evidence-based approach to the evaluation of PVE / CVE and De-radicalisation initiatives, and design, plan and implement such initiatives in proven manner* was achieved in the first period from September 2021 to February 2023 (M1-M18) and is included in the report for this period (see [D8.5](#)).
2. Objectives 2 and 3 were fully achieved in the second half of the project. See the description below.
3. Objectives 4 and 5 were partially achieved in the first half of the project and then continued and were fully achieved in the second half. See the description below.

The table below presents these objectives and the documented results that contributed to achieving the objective, along with a brief description of what the result is about.

2 WORK PERFORMED BETWEEN M19-M37

2.1 INDEED WORK PACKAGES AND MANAGEMENT

The project was divided into 9 Work Packages: WP1-WP6 on the methodology of research and innovation activities and WP7-WP9 that carry out communication, dissemination, exploitation and management activities and also the post-grant requirements related to the ethics matters. The Work Package breakdown is presented in the figure below.

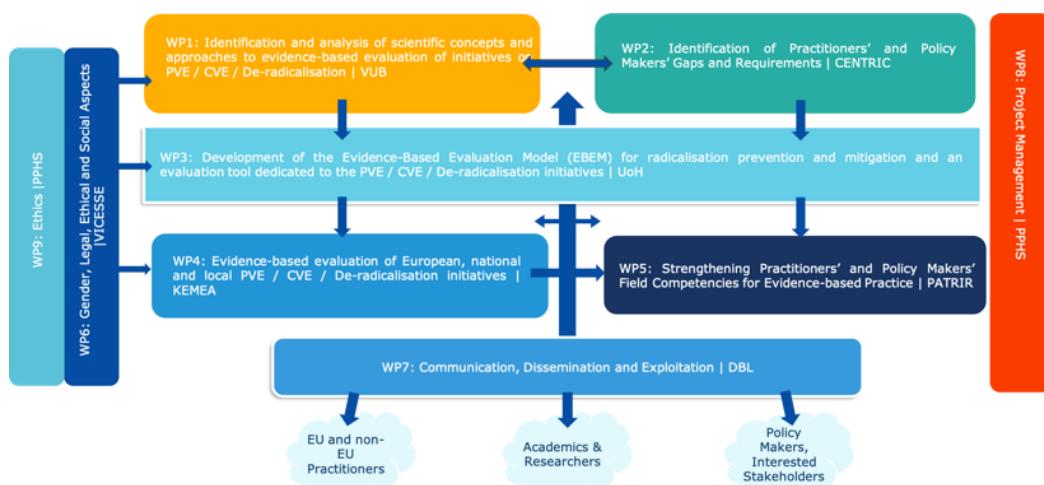

Figure 2 INDEED Work Package Breakdown and interrelations

Every Work Package had its own Leader and was the Leader's role to organise WP kick-off, create WP concept note, organise meetings and deliver its results with the involvement of other partners, including Task Leaders. Work Package Leaders were cooperating closely with the Project Coordinator, Project Manager and Project Management Office and also Task Leaders and partners involved.

2.2 BRIEF OVERVIEW OF WORK PACKAGES IMPLEMENTATION FROM M19-M37 (MARCH 2023-SEPTEMBER 2024)

This part presents an outline of the work carried out in the second period from March 2023 to September 2024 (M191-M37) under individual Work Packages 1-9. Each WP is presented in a table with its objectives, tasks, deliverables, and status as of September 2024. At the end of each table there is a "Conclusions" section that lists additional information relevant to the work package (if any).

| 3 | Provide updated knowledge on existing factors and pathways into radicalisation, and factors influencing resilience to radicalisation as a key element of the methodological evaluation framework for WP3. | T1.3 | D1.3 | <ul style="list-style-type: none">Achieved. The Repository on Risk and Protective Factors was updated every 6 months. The last update with new studies on risk and protective factors was performed in September 2024. The repository contains 274 studies and was updated 4 times during the project. The repository is available in INDEED Toolkit. |

Conclusions:

Objectives 1-2 were achieved in the first period (M1-M18). Objective 3 was also achieved but was continued in the second period. At the end of the project, all WP1 objectives were achieved, tasks were completed and results were delivered.

To ensure that the repository remains up to date throughout the project phase, Task 1.3 has been extended to M37 (end of the project). The extension of the work package has allowed for regular updates which have been performed every six months by the VUB. After four updates, the database includes a total of 274 studies on risk and protective factors (up from 164 studies).

Following the recommendations from the mid-term review, an [online webinar](#) (available on the INDEED website and YouTube channel) was organised to highlight the different uses of the repository for key

groups, including policy makers, researchers and first-line practitioners. The webinar was attended by more than 100 P/CVE stakeholders. To collect feedback from the audience, the webinar included a Q&A.

To disseminate the repository to relevant stakeholders and to collect external feedback, the repository has been presented at several INDEED SMART Hub meetings including in Finland (November 2022), Greece (December 2022) and Belgium (February 2023; twice in March 2024).

The repository has been met with great interest among INDEED target groups as a collection of evidence for designing effective initiatives. In order to continue maintaining and updating the repository, a manual was created explaining how this process is organised and how to do it from the technical side (adding data to the repository). It is the intention of the consortium that the repository will be used in the work of the EU Knowledge Hub on Radicalisation Prevention, as well as used and developed further in research projects.

| Objectives 2-3 were achieved in the first period (M1-M18). In the second period, the implementation of Objective 1 was continued, which involved the inclusion of SMART Hubs in project activities and conducting an evaluation of this part. Details regarding the evaluation of SMART Hubs activities and lessons learnt are presented in deliverable D2.3 SMART Hub Roadmap Evaluation Impact Assessment delivered in September 2024 (M37). | | | | |

At the end of the project, all WP2 objectives were achieved, tasks were completed and results were delivered.

| Conclusions: | | | | |
| All objectives 1-4 and tasks within this Work Package have been completed. | | | | |
| In September 2025 (M25), the translation of two e-guidebooks into 9 languages, in a professional layout, identical to the English version, was finalised. The e-guidebooks are available in PDF format as well as on the Toolkit website as flipping pages. | | | | |
| In December 2023 (M28), another milestone related to this Work Package was achieved - the delivery of a tested and validated EBEM-based Evaluation Tool available online and on mobile devices. Additionally, despite the fact that the translation of the tool was not included in the DoA, the Consortium decided that the main project result would be available in English and 9 languages, similar to other materials. Translation was a time-consuming process and its implementation into 9 languages was completed in August 2024. | | | | |

The Evidence-Based Evaluation Model (EBEM) delivered in the first period, as well as the EBEM-based Evaluation Tool and 2 e-guidebooks formed the INDEED evaluation package, which is available in the INDEED toolkit. The entire evaluation package was used in WP4 activities as well as in WP5 training.

All products of this package were widely disseminated, including within the framework of task T5.2 and WP7.

By June 2024 (M34), all WP3 objectives were achieved, tasks were completed and results were delivered.

2.3 DELIVERABLES

Twenty-two (22) deliverables were delivered in the second half of the project, which is all that was planned. For various reasons, some of them were submitted late, which, however, did not affect the implementation of the project. Each time delays were previously communicated and confirmed with the EC Project Officer.

The table below shows all deliverables from the period with additional information about lead partner, document type, dissemination level, delivery date, and changes (if any) to the submission date. This is followed by an explanation of the selected deliverables and the reasons for their delays, and the rationale for resubmitting six (6) of them. All deliverables were created under the responsibility of the WP Leader with the participation of the Task Leaders (Lead Partners) and other Consortium Partners involved in the WP. Before submitting them to the EC, all deliverables were reviewed by the Partners, and their quality, substantive compliance and visual consistency were checked by the Project Coordinator, Project Manager / Project Management Office.

Amendments

The consortium requested an extension of the project by one month, i.e. until the end of September 2024 (M37). The topic of the project extension was raised and discussed during the 10th General Assembly on 8th January 2024, followed by voting by partners in the form of a dedicated survey, in accordance with the decision-making principles set out in the Consortium and Grant Agreements.

In addition to the project extension, the following changes were also included in the amendment process.

Several deliverables have been re-submitted; these are:

1. D1.3 'Two digital repositories of (1) factors/pathways leading to radicalisation and (2) factors strengthening resilience to radicalisation that present the most recent findings' submitted in M14 (October 2021) and re-submitted in M22 (June 2023) and in M37 (September 2024).
The re-submission related to updating the repository with new studies and implemented improvements.
2. D3.3 'Developed EBEM-based Evaluation Tool that is tested and validated – available online, on mobile devices' submitted in M28 (December 2023) and re-submitted in M32 (April 2024).
The re-submission related to deliverable name change.
3. D3.5 'Professional e-Guidebook on Evidence-based Evaluation available in 10 languages' and D3.6 'Professional e-Guidebook on designing, planning and implementing evidence-based practices available in 10 languages' submitted in M18 (February 2023) and re-submitted in M25 (September 2023).
The re-submission related to deliverable name change.
4. D3.7 'Report describing the refined and optimised model and tool' submitted in M28 (December 2023) and re-submitted in M32 (April 2024).
The re-submission related to translating the English version of both e-guidebooks into 9 languages and delivering them in a professional graphic layout.

5. D5.4 'Toolkit for practitioners and policy makers including an e-learning suite' submitted in M24 (August 2024) and re-submitted in M30 (February 2024) and M37 (September 2024).

The re-submission related to the addition of the e-learning suite and improvements to the Toolkit and its components.

2.4 PROJECT MILESTONES

All eleven (11) milestones have been achieved by the end of the project. The first 6 (MS1, MS2, MS3, MS4, MS5, MS10) were achieved in the first period and the remaining 5 (MS6, MS7, MS8, MS9, MS11) in the second part of the project. Details of the milestones achieved up to September 2024 (M37) are presented in the table below.

Table 4 List of INDEED milestones achieved in the period M19-M37 (March 2023-September 2024)

2.5 GANNT CHART

The Gantt presented below was updated by the Project Management Office on regular basis and this was due to the changes indicated in the earlier points in the report (including changes made in the amendment process). The GANTT chart shows the duration of individual tasks within the work packages marked in grey, the time of submission of deliverables according to DoA (❖), delayed deliverables marked in red (❖) and re-submitted in blue (❖). Milestones are also shown as a triangle (▲). Despite quite critical delays related to selected elements in WP5 and a large number of translations of selected results and implementation of different language

versions, all project's tasks were completed, all goals were achieved, all results were delivered, all milestones were reached.

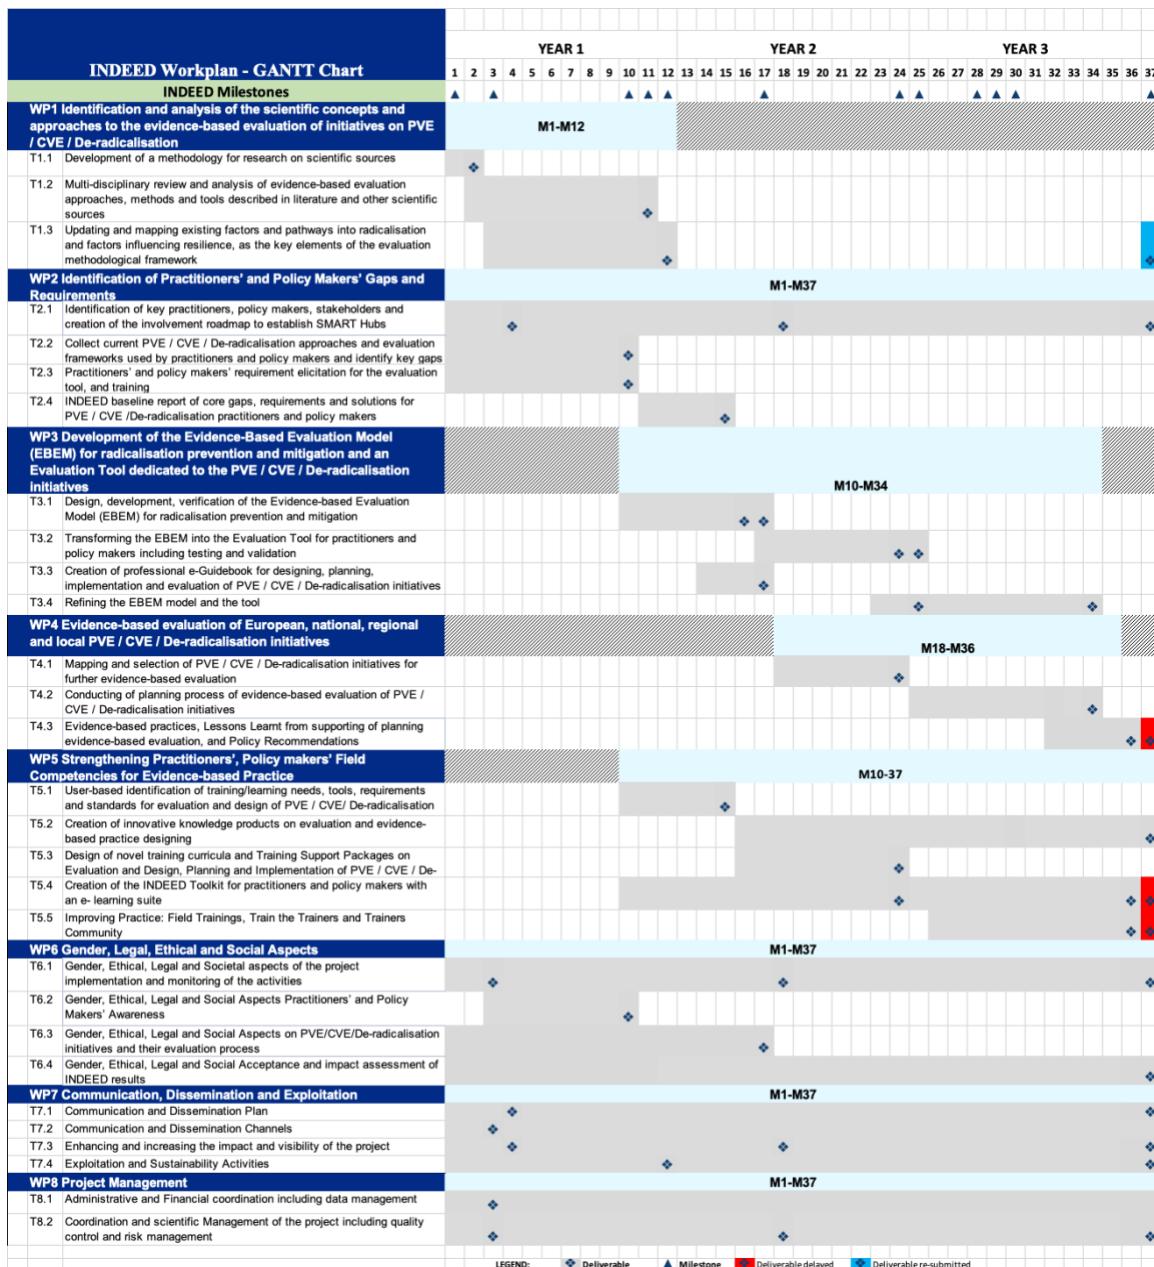

Figure 4 INDEED updated Gantt chart – status as of September 2024 (M37)

2.6 MANAGEMENT, ADMINISTRATION AND FINANCIAL TASKS

Management, similarly to the first period, was based on the guidelines presented in D8.1 Project Management Guidebook (confidential status), which was delivered in November 2021 (M3). The management structure as well as the roles of individual bodies (Project Coordinator, Project Management Office, Work Package Leaders, Consortium, etc.) and the management standards and procedures described in detail in D8.5 Mid-term Management and Quality Report (public status) did not change.

In the second period of project implementation, similarly to the first, there was no need to ask for a Security Officer advice on security concerns.

The Coordinator and the Project Management Office used the same principles and tools for internal consortium communication and management, such as:

- Regular consortium face-to-face meetings; at least once a year (General Assembly); bi-monthly online meetings (General Assembly); monthly WP Leaders meetings, Face-to-face group meetings; ad-hock meetings when needed;
- Access to an on-line communication and file sharing platform dedicated to the INDEED project - Microsoft Teams;
- Written internal progress summaries every two (2) months;
- Regular contact between the Project Manager and Project Management Office, the WP Leaders and other partners;
- Regular e-mail correspondence;
- Deliverables review process implemented;
- Task Force meetings (for specific tasks).

In the period from March 2023 to September 2024 (M19-M37), the following cyclical or one-off meetings related to project management were organised. They have been presented in the table below. After each meeting, the key points discussed were summarised and documented in meeting minutes, which were distributed among Partners and stored in the TEAMS project repository. At the end of this document there are photos from selected INDEED meetings.

- To discuss the INDEED Legacy and possible ways forward;
- To close the project.

Regular internal financial monitoring was also carried out using a dedicated form. Financial data collection took place every 6-8 months. In the case of underspending or overspending, the Project Coordinator and PMO organised bilateral discussions with the partners concerned to clarify these issues. In addition, all financial inquiries from Partners sent via email have been answered.

2.7 COMMUNICATION, DISSEMINATION AND EXPLOITATION

All activities related to Communication and Dissemination by the end of the project were described in detail in deliverable **D7.6 Final Dissemination Report**, prepared by Deep Blue - INDEED C&D Manager. The report is publicly available on the INDEED website.

The exploitation-related work during the second period followed a strategy outlined in a prior deliverable **D7.7 Initial Exploitation Plan**. The **Final report on Exploitation** (D7.8) was delivered in September 2024 (M37) and presented how the proposed exploitation strategy was implemented.

3 CONCLUSIONS

The proposed project management approach and quality control mechanisms contributed to the successful completion of the project objectives. Strong coordination and management provided by the Coordinator, Project Management Office, Work Package Leaders and Task Leaders as well as effective risk management and communication efforts, combined with quality assurance processes, ensured that the project was delivered efficiently and to a high standard.

The weak points include too many deliverables planned for the last months of the project, which resulted in a significant overload.

The lessons learnt from this experience will form the basis for improving future project delivery and management strategies.
